

Jack Roof & Aleisha Nelson

Idea

- More transparency between donors and organizations
 - People want to know specifically where their money is going to
 - People want to be able to search for and donate to specific areas of an organization
-
- RSOC 135 (Architects of Solidarity) - field trips to organizations
 - Met with members and listened to their stories
 - Getting to know the people behind the charities will get more people to donate

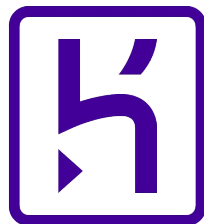

Goals

- Increase donor interest in and awareness of organizations that align with their interests
- Donors know exactly where their money is going and how it will be used
- We want people in need to be more comfortable asking for money
 - Allow to go through charity orgs to create profiles
 - This forces people to get involved with the orgs and gets charities names out there

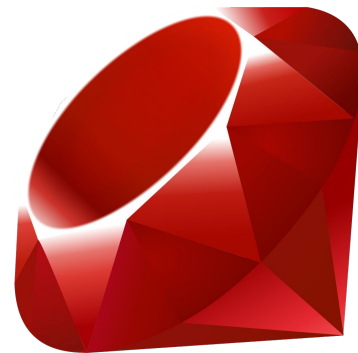

Moving Forward

- Organization application
- Admin view for orgs to manage members and see donations
- Computer stations at orgs for members to check their profile and view their donations
- PayPal/Square API link setup going straight to the organization
- Ability to search for people in need according to location and ability to search for specific types of charities
